Space & Naval Warfare Systems Center Awards Contract

SAN DIEGO — Science Applications International Corporation, San Diego, is being awarded a \$5,315,657 indefinite delivery/indefinite quantity-type contract with cost plus fixed fee pricing arrangement for engineering services for life-cycle support of surveillance programs/systems and tactical data communications, including automated radio communication systems and satellite terminal systems. Contract requirements support development, test, and integration of Navy command, control, communication, computer, intelligence and ocean surveillance systems. This contract contains four one-year options which, if exercised, will bring the total cumulative value to \$27,648,256. Work will be performed in San Diego. The period of performance is from February 2000 through February 2005. Contract funds obligated in the amount of \$125,000 are from the Navy Working Capital Fund and will not expire at the end of the current fiscal year. This contract was competitively procured via solicitation posted on the world wide web at the Space and Naval Warfare Systems Command Business Opportunities Homepage; four offers were received and awarded. Space and Naval Warfare Systems Center San Diego, California is the contracting activity (N66001-00-D-5042).
